26 (New) Amendment for personal use comprising:

01 FC:1202  
02 FC:1201

504.00 CH  
336.00 CH  
driving mechanism including an electric motor; and

a control stage, wherein the control stage is configured, when the electric motor is turned off, to send a unipolar analog signal from an energy supply to the electric motor, causing the motor to emit audible signals, and wherein the unipolar analog signal has a time average that lies below the signal value required for motor activation. --
